**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3, 10 and 12 it is not clear as to how the flexible protection element is adapted to fold around the releasable connection. Does it just loosely fold around it and hang freely or is it somehow attached to the releasable connection.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by TURK (WO99/23904)..

Turk discloses and undergarment 34 as seen in figure 4 at 10' with a front part 22, back part 26 and a crotch part (at 10') and two leg holes not numbered with a releasable connection at 10' with two parts 24, 26 each with elements 16 and 18 that join in an overlapped region when closed to connect the crotch part to the front part and that are separated from one another when in an open condition to form a crotch opening. The

releasable connection extending from one leg hole to another as seen in figure 4 and a flexible protection element 24 (with elements 16,18) that at least partly covers the overlapping region in the closed condition to increase wearer comfort.(See figure 2 and figure 4) The leg holes are part of the opening as claimed. The flexible protection element is attached to the outer overlapping part as desired and folds around the releasable connection in the closed connection. As seen in figure 2 since the lower flap 26 extends over the flap end 22 to cover the connection with 24. The claims does not state that the means folds around to the side edges extending form leg hole to leg hole. The flexible protection element is made of any material and is wearable against skin as claimed as seen in figure 4.. The element is considered a ribbon as broadly claimed since a ribbon is a strap and the flap of Turk is a strip or ribbon as broadly claimed. The element includes loops 16 as claimed. The element has the width as claimed. The element is on the inside as 26 as broadly claimed. The element can be either 24 or 26 as broadly claimed. And is connected with the fastener 16, 18. The flap is an elongated strip of material as claimed.

### ***Response to Arguments***

Applicant's arguments filed 10-7-08, with respect to O'Brien reference rejection have been fully considered and are persuasive. The rejection of O'Brien has been withdrawn due to the claim amendments. The Turk reference discloses the invention as broadly caliemd and best understood. Applciant has not claimed the exact ribbon structure and its location and function as argued. The structure needs to be better defined as to the exact ribbon structure and its exact location.. The loop structure and

that the ends fold over the edges of the side edges of the crotch panel must be clearly claimed.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
